MOUSE BLOW GUN WITH SILENCED NOZZLE

AIRSET® MOUSE

Cod. MSE SL 1004

With safety silenced nozzle, for a high noise reduction. Nozzle is designed for sensitive operations, like car cleaning or drying delicate parts; where it's important to preserve the surface. Nozzle offers a wide flow for cleaning surfaces, objects and machinery. The vented tip also prevents pressure exceeding 30 PSI (2 Bar) if the tip becomes blocked (conforms with OSHA Std 1-13.1).

Grip

Blow gun can be operated in vertical, for top air connection. Grip and handle are designed for vertical air supply connection. This offers the best safety and ergonomics for these applications; especially when repetitive use occurs.
