Tucano Blow - Blow gun, spiral hose, quick coupling and plug kit

AIRSET®

Cod. KPAN PL40 56E74

Professional Airset Tucano Blow gun with plastic nozzle, complete with **95 Shore polyurethane spiral hose**, **AT240 safety quick coupling** and plug. The nozzle creates a **concentrated airflow**, reduces turbulence, and provides **precise and effective blowing**. The nozzle is made of wear-resistant plastic, and the material is **scratch-resistant** for delicate surfaces. **Suitable for connection with European profile DN 7.4 quick couplings and plugs.**

Ready-to-use kit, no need to screw the hose onto the compressor system. **The connection to compressed air is made via a quick coupling**. It consists of a 95 Shore polyurethane coiled hose assembled with a blow gun with plug, **AT240 safety quick coupling** and plug. **If the system is not equipped with a quick coupling, an additional one can be requested**.

Safety quick coupling

AT 240 has been designed with a **two-stage safety exhaust function**: two movements. Before disconnection, the **pressure is released**, **eliminating the whiplash effect**, which is harmful to the operator, and **reducing noise** during disconnection. **This also prevents accidental uncoupling of the coupling.**

Kit features

- Blow gun with bent stainless steel tube, suitable for harsh environments and extreme conditions.
- Spiral hose made of 95 Shore polyurethane; with **plastic anti-kink spring**: **no scratches** on contact surfaces
- **Safety quick coupling** included. For **quick connection** of the blow gun or to connect other tools
- 2 plugs included: one on the gun to connect to the coupling, the other at the end of the hose to **connect to the system**
- Coiled hose **available in different lengths and diameters**
- Possibility to **customize** the kit with customer colors.

SPIRAL HOSE MATERIALS

Hose	**Polyurethane (PU)**
Spring	**Plastic**
Fittings	**Brass**
O-rings	**NBR**

BLOW GUN MATERIALS

Trigger	**Nylon and rubber**
Connection	**Brass**
Valve	**Acetal**
Body	**Nylon**
Nozzle	**Nylon**

QUICK COUPLING MATERIALS

Thread	**Brass**
Metal parts	**Stainless steel**
Body	**Technopolymer**
Seals	**NBR**

TECHNICAL DATA SHEET

Operating temperature	**-10°/70° - 14/158 °F**
Maximum inlet pressure	**10 Bar - 145 psi**
Connection	**European profile DN 7.4**
Blowing force (at 6 bar inlet)	**2.1 N**
Air consumption (at 6 bar inlet)	**200 l/m - 7 scfm**
Sound level (at 6 bar inlet)	**83 dB(A)**
