

## Spiral Hose with Quick Coupling and Plug Kit Ø 5x8 – Yellow

AIRSET™

Mod. KSG071050804

Compressed air connection kit with included quick coupling. High-visibility yellow hose with a diameter of 5x8 mm, available in lengths of 3, 4, 6, and 8 meters.

This kit is designed to be immediately ready for use, with no need to screw the hose onto the system or the compressor. The connection is made through a quick plug, ensuring practicality and speed in daily operations. The kit includes a polyurethane 95 Shore spiral hose, assembled with an AT 240 quick coupling and plug.

### Main Features:

- **95 Shore Polyurethane Spiral:** This material offers excellent resistance and flexibility, ensuring long-lasting durability. The spiral is equipped with a plastic anti-kink spring that prevents scratches on contact surfaces.
- **Safety Quick Coupling Included:** Ideal for fast and secure connection of blow guns or other pneumatic tools, reducing setup times and increasing operational efficiency.
- **European-profile DN 7.4 quick plug included:** Positioned at the end of the hose, it facilitates system connection while ensuring a stable and reliable seal.

### Advantages of the High-Visibility Hose:

- **Enhanced safety:** The high-visibility yellow color makes the hose easy to spot, reducing the risk of tripping or accidental damage during use. This is especially useful in crowded or poorly lit work environments.
- **Easy identification:** In contexts where multiple hoses and cables are present, a high-visibility hose is quickly distinguishable, simplifying maintenance operations and reducing intervention times.
- **Professional appearance:** The high-visibility yellow hose not only improves safety but also contributes to a tidy and professional workspace, reflecting attention to detail and organization.

These advantages make the compressed air connection kit with a high-visibility yellow hose an excellent choice for those seeking safety, efficiency, and professionalism in their pneumatic equipment.

**HOSE MATERIALS**

Hose	<b>Polyurethane (PU)</b>
Spring	<b>Plastic</b>
Fittings	<b>Brass</b>
O-rings	<b>NBR</b>

**QUICK COUPLING MATERIALS**

Thread	<b>Brass</b>
Metal Parts	<b>Stainless Steel</b>
Body	<b>Technopolymer</b>
Seals	<b>NBR</b>

**TECHNICAL DATA SHEET**

Operating Temperature	<b>-30°C / +60°C</b>
Max. Pressure	<b>10 Bar</b>
