

## Professional kit - Tucano L130 blow gun with accessories

**AIRSET® TUCANO**

### **Cod. KTCN5000**

Professional kit. Suitcase with blowgun and accessories. Kit is composed of a Tucano L130 professional blow gun, chip guarding shield, venturi nozzle, safety nozzle and rubber tip.

Tucano blow gun L130 offers an angled stainless steel nozzle, **designed for professional industrial use**. Nozzle construction guarantees resistance to wear; at the same time, stainless steel is resistant to corrosion and chemicals.

### **Variable airflow trigger**

Tucano adopts a special valve which allows a **progressive control of the lever: this reduces the noise level and air consumption**. In the progressive mode the operator can adjust the flow with great precision, which is useful in the most jobs. Instead, fully pressing the lever will use all the blowing force.

### **Ergonomic handle**

Tucano offers a Soft-Touch handle, made of soft ergonomic rubber, for **comfort and easy handling**. **This material reduces the risk of repetitive strain injuries**.
