

Professional Air blow guns and Transfer pumps

AIR BLOW GUNS

A RANGE DESIGNED AROUND THE APPLICATION

FROM EVERYDAY BLOW GUNS TO SPECIALIZED SOLUTIONS

TUCANO

Professional performance, ergonomics and progressive airflow control

STANDARD

Versatile, for several needs

ECO

A simple and competitive solution

MOUSE

Specific grip for vertical blowing and repetitive work

RUBBER FLOW

Compact and made entirely of rubber. No lubricants. For the dental technology and cleanroom industry

PRESSURE REDUCER

Pressure reduction from 6 bar to 3.5 or 2.0 bar. To reduce consumption and noise

TUCANO a professional solution

From general cleaning to delicate surfaces, from large areas to hard-to-reach spots: choose the model with the most suitable nozzle.

Tucano is a professional air blow gun designed for industrial environments and demanding conditions. The ergonomic grip, soft rubber handle and progressive airflow control ensure comfort and precision.

Made with technical materials and durable components such as the impact-resistant body and internal stainless steel parts. It offers reliability and long-lasting performance.

The option to choose from different nozzles and configurations allows you to tailor the blow gun to your specific needs.

ANTI-SCRATCH NOZZLE

- Delicate surfaces
- Assembly lines
- Auto body shops and auto repair shops
- Cleaning, drying, and cooling
- of large surfaces
- SUVA-approved

FLAT NOZZLE

- Blowing air over large surfaces
- Cleaning industrial desks and work surfaces
- High durability

SILENCED NOZZLE

- Low noise level
- Protects the operator's hearing
- Fan-shaped blow for cleaning, drying, and cooling large surfaces
- Industrial environments, car washes, and repair shops

VENTURI NOZZLE

- Venturi effect for greater blowing force
- 25% more force than a standard air gun
- Non-lockable nozzle for improved safety
- Greater effectiveness with lower air consumption

OSHA SAFETY TUBE

- Cleaning, drying, and cooling
- Stainless steel tube resistant to water, corrosion, and chemicals
- Ideal for environments with chemical or corrosive liquids
- Safety tube with pressure relief at 2 bar
- Non-lockable, ideal for high safety standards

STANDARD the versatile solution for industry and workshops

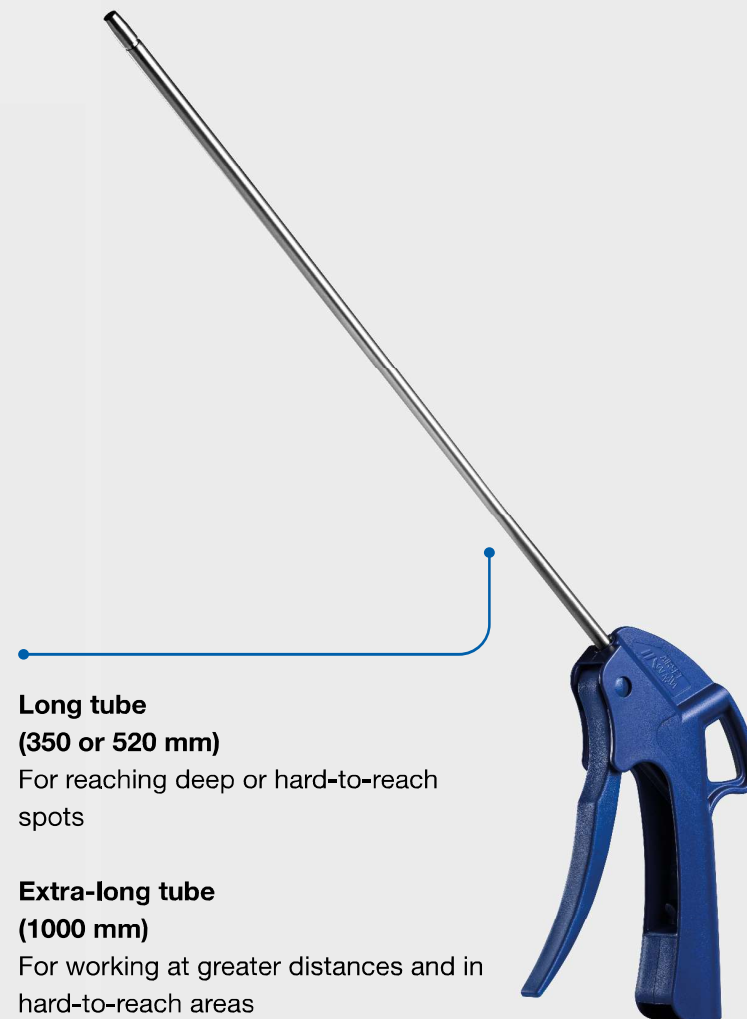

A practical choice, designed for everyday use.

Standard Standard is a versatile air blow gun, designed for routine cleaning, drying, and cooling tasks in **workshops and industrial settings**.

A practical and functional range, **available with different tube lengths** to suit various work requirements: from close-range blowing to hard-to-reach areas.

Short tube (130 mm)
For everyday tasks and greater maneuverability

Long tube (350 or 520 mm)
For reaching deep or hard-to-reach spots

Extra-long tube (1000 mm)
For working at greater distances and in hard-to-reach areas

Safety **PRESSURE REDUCED** blow guns

Reducing pressure means reducing consumption.

6 - 3,5 bar

Pressure reduction of 2.5 bar

≈ 50% energy saving

relative to the gun's consumption

Improved safety

Pressure reduction and SUVA Pro certification

>300 - <150 l/min

Air consumption cut in half

Less noise

Up to 75 dBA

SUVA PRO

Two safety tests

Noise: Leq < 85 dBA

Burst pressure: 72 bar for 30 seconds

They reduce the inlet pressure from 6 bar (standard system) to 3.5 bar. **Lower pressure means greater safety and more efficient blowing with adequate performance.**

Why use a gun with a pressure reducer?

- Noise reduction: blowing is very quiet
- Energy savings: the built-in pressure reducer, which reduces pressure from 6 bar at the inlet to 3.5 bar at the outlet (or from 6 to 2 bar), allows for lower air consumption.
- Safety: the product complies with European and OSHA (U.S.) regulations. The product is also SUVA Pro certified (Swiss National Accident Insurance Fund).

Compressed air is expensive! The pressure reducer can help you save money. **• It uses less air: up to 50% less!**

AMPLA solutions for every blowing need

TUCANO

MOUSE

PRESSURE REDUCED

RUBBER FLOW

	TUCANO	STANDARD	ECO	MOUSE	PRESSURE REDUCED	RUBBER FLOW
PERFECT FOR	Professional applications	Routine blowing	Blowing occasionally	Blowing Specific	Efficiency and safety	Applications for delicate items
APPLICATIONS	Specialized industries, automotive, auto body shops	Workshops, general industry, maintenance workers	Occasional user, agriculture	Workbenches, assembly lines	Production departments, multiple workstations, companies with safety and energy-saving requirements	Dental technician workbenches, finishing, clean room
STRENGTHS	Ergonomics, durability, different nozzles	Versatility and ease of use	Essential and competitive	Easy to handle, vertical grip	Reduction in pressure and consumption	Surface protection, no lubricants
